

Applicant: Suntek Print Company Limited
Address: 3A301, No.109, Luk Ka Rd., Henggang Town, Longgang District, Shenzhen, 518115, China
Sample(s) No.: CNT2016100004
Product Description: Tattoo adhesive decal paper
Type/Model: STC-T10(L), STC-T04, STC-T05, STC-T06, STC-T07, STC-T12, STC-T13
Buyer: _____
Supplier:- _____

Date of Receipt: October 09, 2016

Test period: October 09, 2016–October 14, 2016

Test Request: 169 SVHC SCREENING ANALYSIS: Substance of very high concern According to Regulation (EC) No.1907/2006 Article 7(2) and 33:Registration, Evaluation, Authorization and Restriction of chemicals(REACH)

Test Result: Please refer to following page(s).

Conclusion: The detected SVHC concentration is <0.1%, importer has neither to communicate information down the supply chain according to article .33 nor to notify acc. to article 7(2) of REACH.

Tested by: _____

Approved by: _____

CANEW TESTING AND CERTIFICATION LTD

Issue date: October 14, 2016

Notification:

1. The present test report is invalid without the match mark of the special test report stamp and CANEW responsible signature.
2. The customer, in case for any questions, should provide a written demand to CANEW within 15 days following the reception of the report.
3. The unrepeatable test will no be reproduced.
4. The present test report issued only concerned the testing samples.
5. This test report cannot be partially reproduced without prior written permission of CANEW TESTING AND CERTIFICATION LTD

CANEW TESTING AND CERTIFICATION LTD

present in those articles above a concentration of 0.1% weight by weight (w/w).

Article 33 of Regulation (EC) No 1907/2006 requires supplier of an article containing a substance meeting the criteria in Article 57 and identified in accordance with Article 59(1) in a concentration above 0.1% weight by weight (w/w) shall provide the recipient of the article with sufficient information, available to the supplier, to allow safe use of the article including, as a minimum, the name of that substance in the Candidate List.

(3) Concerning material(s):

Test results in this report are based on the tested sample. This report refers to testing result of tested sample submitted as homogenous material(s). In case such material is being used to compose an article, the results indicated in this report may not represent SVHC concentration in such article. If this report refers to testing result of composite material group by equal weight proportion, the material in each composite test group may come from more than one article.

If the sample is a substance or mixture, and it directly exports to EU, client has the obligation to comply with the supply chain communication obligation under Article 31 of Regulation (EC) No.1907/2006 and the conditions of Authorization of substance of very high concern included in the Annex XIV of the Regulation (EC) No. 1907/2006.

(4) Concerning substance and preparation:

If a SVHC is found over 0.1% (w/w) and/or the specific concentration limit which is set in Regulation (EC) No 1272/2008 and No 790/2009, client is suggested to prepare a Safety Data Sheet (SDS) against the SVHC to comply with the supply chain communication obligation under Regulation (EC) No 1907/2006, in which:

- a substance that is classified as hazardous under the CLP Regulation (EC) No 1272/2008.
- a mixture that is classified as dangerous according Dangerous Preparations Directive 1999/45/EC or classified as hazardous under the CLP Regulation (EC) No 1272/2008, when their concentrations are equal to, or greater than, those defined in the Article 3(3) of 1999/45/EC or the lower values given in Part 3 of Annex VI of Regulation (EC) No. 1272/2008; or
- a mixture is not classified as dangerous under Directive 1999/45/EC, but contains either:
 - (a) a substance posing human health or environmental hazards in an individual concentration of ≥ 1 % by weight for mixtures that are solid or liquids (i.e., non-gaseous mixtures) or ≥ 0.2 % by volume for gaseous mixtures; or
 - (b) a substance that is PBT, or vPvB in an individual concentration of ≥ 0.1 % by weight for mixtures that are solid or liquids (i.e., non-gaseous mixtures); or
 - (c) a substance on the SVHC candidate list (for reasons other than those listed above), in an individual concentration of ≥ 0.1 % by weight for non-gaseous mixtures; or (d) a substance for which there are Europe-wide workplace exposure limits.

(5) If a SVHC is found over the reporting limit, client is suggested to identify the component which contains the SVHC and the exact concentration of the SVHC by requesting further quantitative analysis from the laboratory.

Test Result : (substances in the Candidate List of SVHC):

No.	Substance name	CAS NO.	EC NO.	Detection Limit (%)	Result (%)

169	Benzo[def]chrysene (Benzo[a]pyrene)	50-32-8	200-028-5	0.005	N.D.

Notes:

(1) All Detection Limit are based on homogenous material

N.D. = Not detected (lower than RL), N.D. is denoted on the target compound.

(2) ΔCAS No. of diastereoisomers identified (α-HBCDD, β-HBCDD, γ-HBCDD): 134237-50-6, 134237-51-7, 134237-52-8.

(3) * The test result is based on the calculation of selected element(s) / marker(s) and to the worst-case scenario.

Calculated concentration of boric acid, disodium tetraborate, anhydrous and tetraboron disodium heptaoxide, hydrate are based on the total boron and sodium by ICP-OES.

Detection Limit = 0.005% is evaluated for element (i.e. cobalt, arsenic, lead, sodium, chromium, chromium (VI), silicon, aluminum, zirconium, boron and potassium respectively), except molybdenum Detection Limit = 0.0005%
